

MS-300T03-A: Enabling Microsoft Teams for Collaboration

OBJECTIVE

Microsoft Teams is the hub for Teamwork in Microsoft 365. In this course you will learn how to plan, deploy, and manage Microsoft Teams. Specifically, this course discusses the relationship of Teams with SharePoint, OneDrive, and Office 365 Groups. It provides best practices for the adoption and deployment of Teams within your organization. It also covers how to establish guest policies and data governance for your Teams data.

This course is designed for IT Professionals who manage and deploy Microsoft Teams in their organization.

This is the third in a series of four courses for the Teamwork administrator role. These courses help prepare for the exam MS-300: Deploying Microsoft 365 Teamwork.

COURSE TOPICS

Module 1: Plan a Microsoft Teams Deployment

This module is all about planning for Microsoft Teams. It discusses how users will authenticate to use Teams and best practices for deploying teams in your organization.

Lessons

- Getting Started with Teams
- Deploying Teams
- Teams and Channels
- Authentication and Access

After completing this module, students will be able to:

- Explain how Teams interacts with SharePoint Online, Exchange Online, and OneDrive
- Describe the different Teams clients and how they can be used
- Describe how to prepare your network for Teams traffic
- Describe best practices steps to deploy Microsoft Teams
- Define objectives, risks, and key results for your Teams deployment
- Describe the different capabilities of the different roles in Teams
- Describe how teams and channels are used to organize content in Microsoft Teams

Module 2: Configure Microsoft Teams

This module explains how to set up and configure Microsoft Teams. It discusses the use of tabs, bots, and connectors in Teams. It introduces concepts related to managing meetings in Teams.

Lessons

- Set up Microsoft Teams in Office 365
- Apps in Microsoft Teams
- Meetings in Teams

After completing this module, students will be able to:

- Set up Microsoft Teams in Office 365
- Describe and administer apps in Microsoft Teams
- Utilize bots and tabs within Teams
- Describe and use connectors in Teams
- Describe meeting concepts in Teams
- Describe the devices available to facilitate meetings in Teams

Module 3: Manage the Teams Environment

This module is focused on managing Microsoft Teams. Specifically, we discuss security and compliance as well as privacy and data governance. While this course does not cover voice calling explicitly, this module discusses quality of service-related topics.

Lessons

- Privacy and Governance
- Security and Compliance
- Management and Reporting

After completing this module, students will be able to:

- Describe the security and compliance features available for Teams
- Describe how Microsoft Intune can be used to secure Teams data on mobile devices
- Conduct audit log and content searches for Teams
- Describe Microsoft's approach to data privacy in Office 365
- View Office 365 reports that measure Teams usage
- Enable Quality of Service for Microsoft Teams

PREREQUISITES

Learners should start this course already having the following skills:

- Basic understanding of Active Directory and Azure AD
- Basic understanding of mobile device management and alternative operating systems (Android and macOS)
- Experience with Windows PowerShell

TRAINING APPROACH

This course includes lectures, course notes, exercises and hands-on practice.

COURSE DURATION

Bundle course in 3 days

Time: 9:00am to 6:00pm

Lunch Time: 1:00pm to 2:00pm

CERTIFICATION COMPLETION

A certificate of completion is provided for all trainees attending the course.
